EUROPE'S LEADING AEM DEVELOPER CONFERENCE

28th – 30th SEPTEMBER 2026

Conversion Factory - Work in Progress

Jack Jin

Introduction

Jack Jin

Associate Director

Accenture

adaptTo()

The Situation

S T A R

Years of AEM

Platform, blocks, content and teams, all paid for

×

High Revenue

Real money runs through the site

=

Small Lifts Count

Any small shift in conversion shows up in revenue

There is no shortage of ideas. The limit is how many the team can test and prove.

adaptTo()

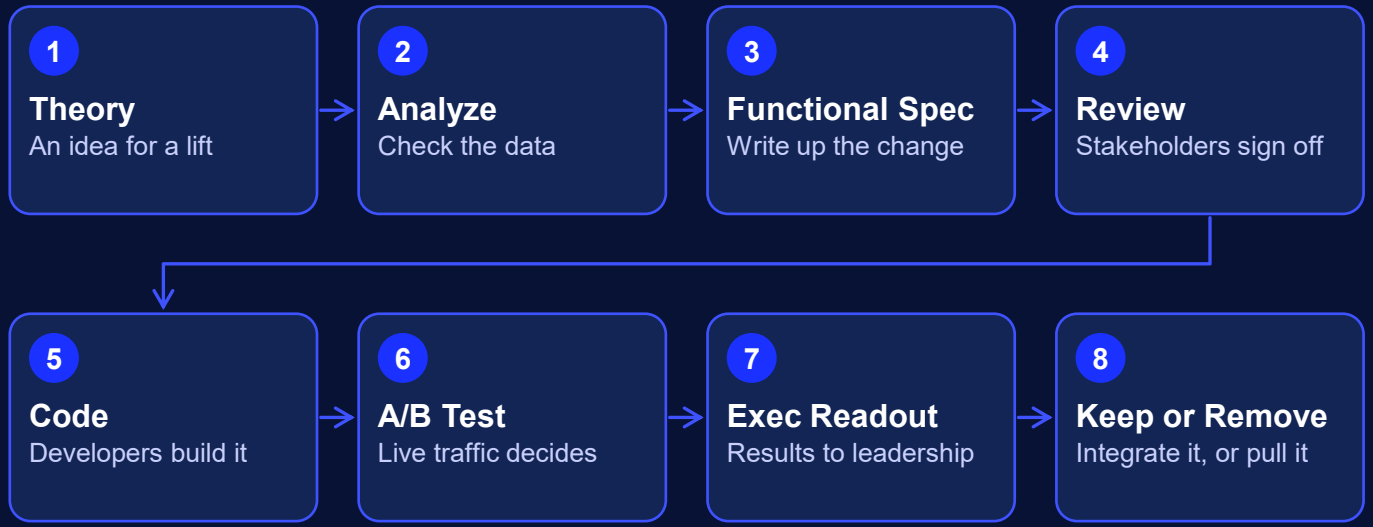

The Task

S T A R

7-8

people in the pod

every step manual

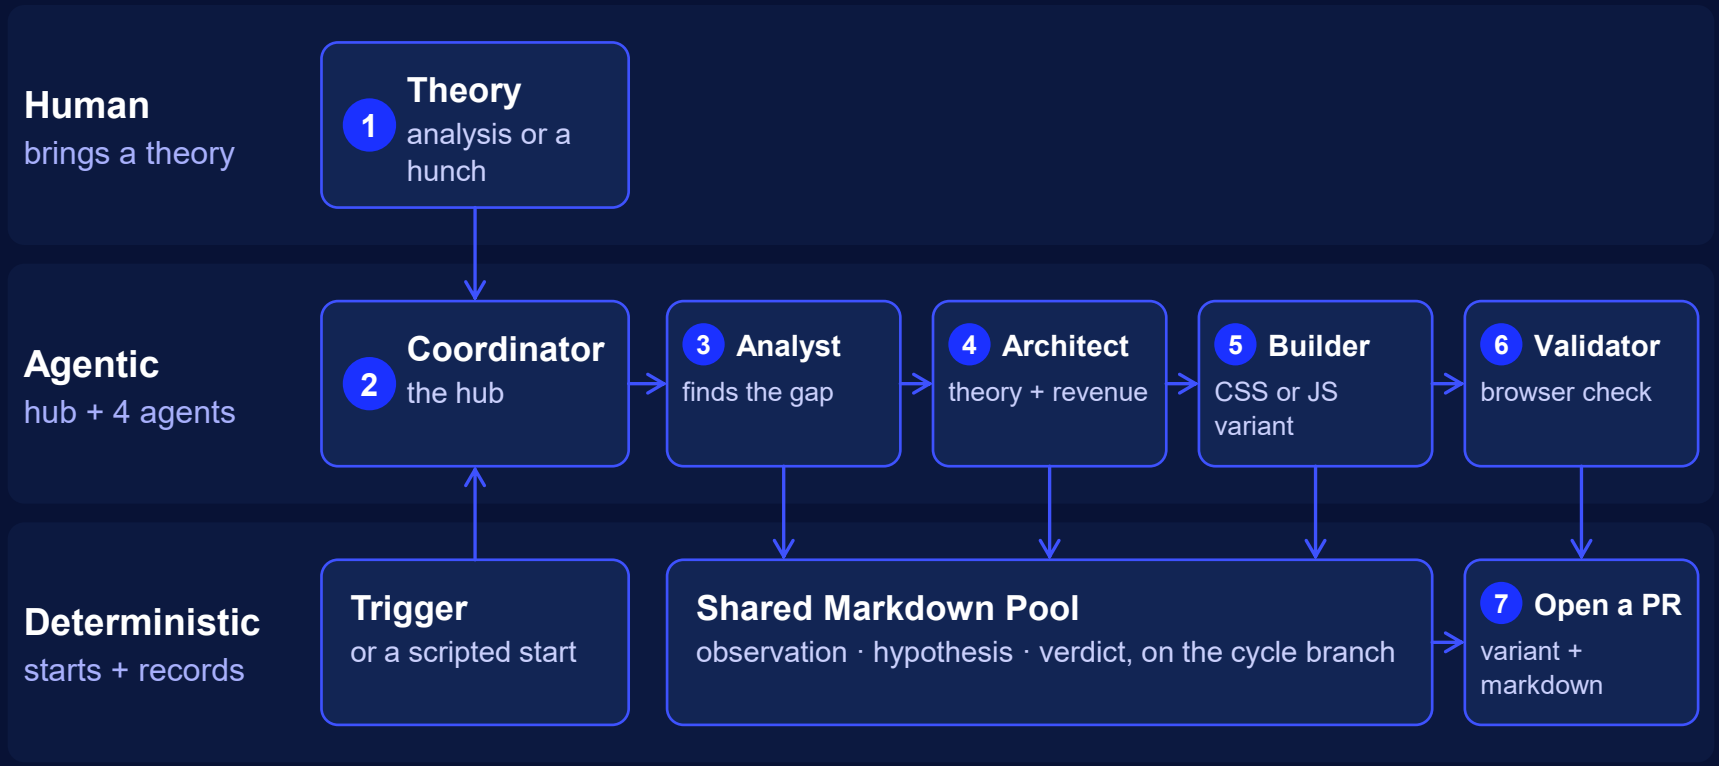

THE TASK **Help the same pod test more theories. Humans still make the calls.**

adaptTo()

Phase 1: Generate the PR

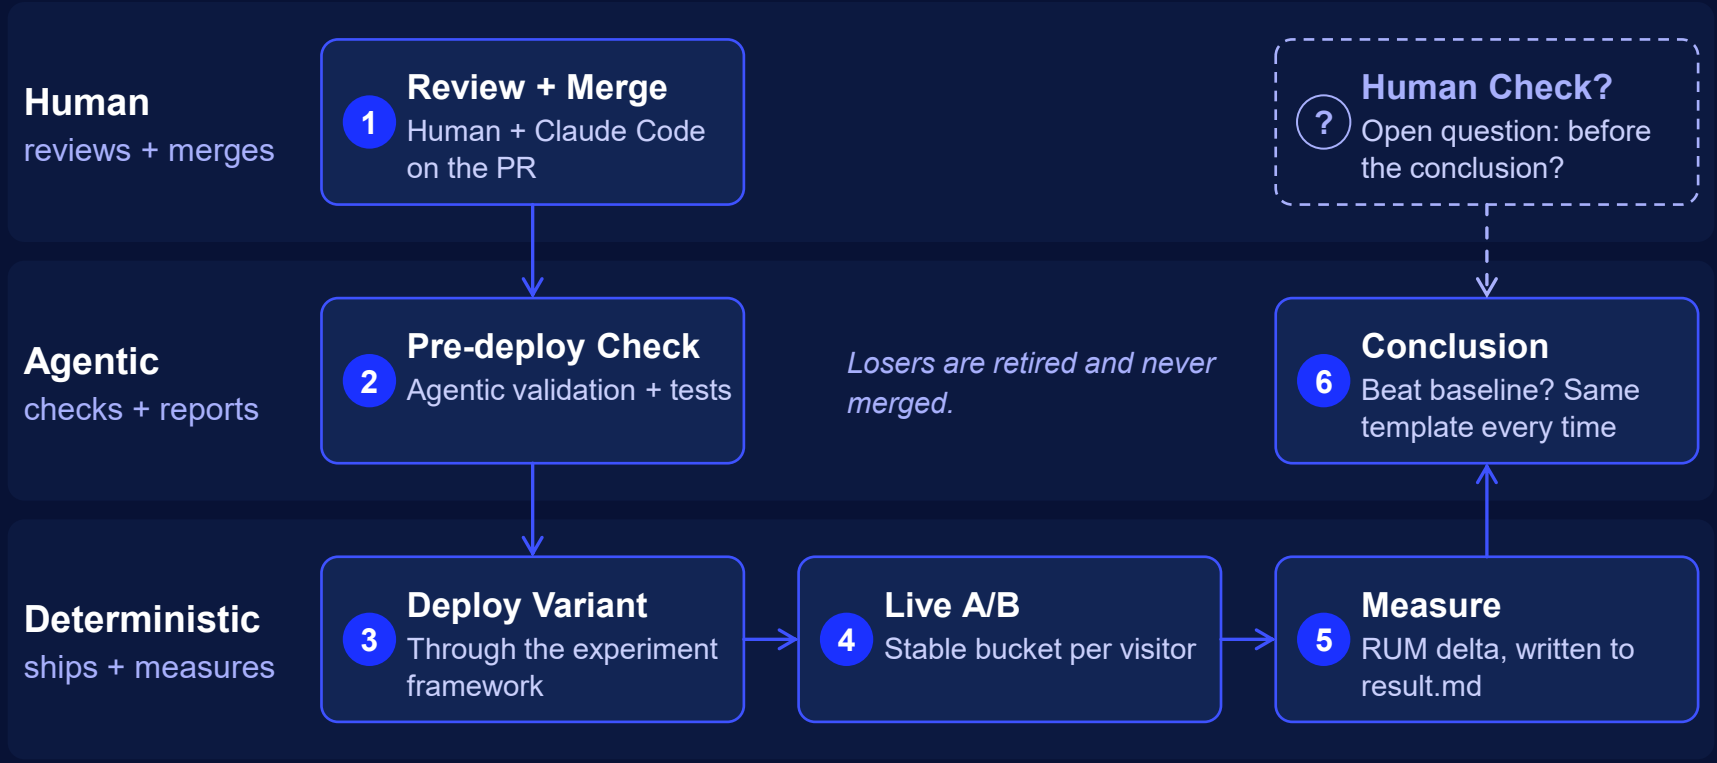

S T A R

adaptTo()

Phase 2: Review + Live A/B

S T A R

adaptTo()

Phase 3: Promote the Winner

S T A R

Human
merges winners

Only winners get here.

Agentic
builds the PR

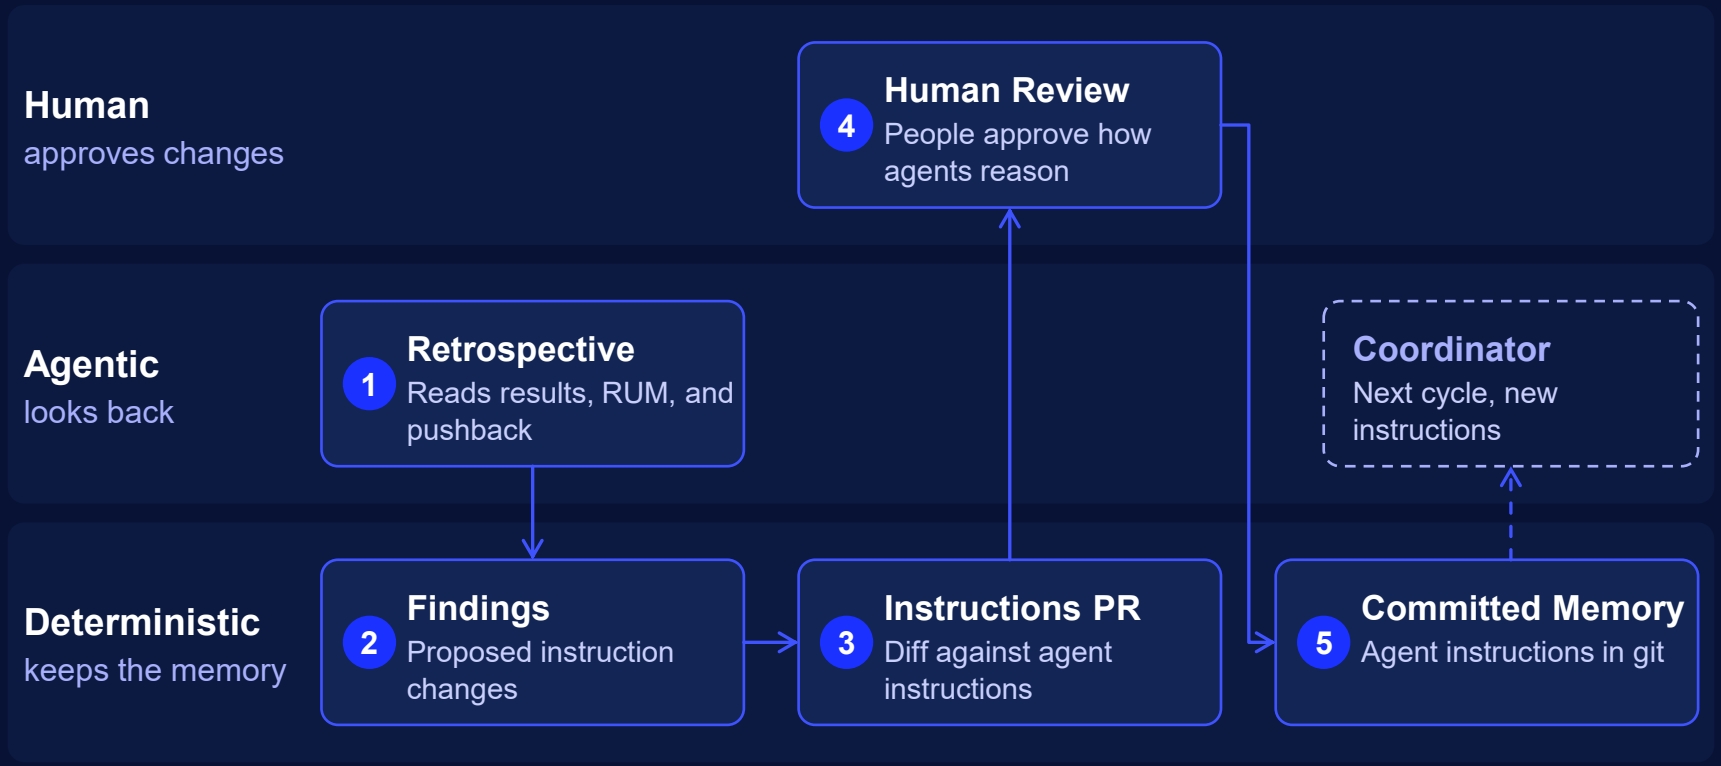

Deterministic
new baseline

adaptTo()

Phase 4: Learn Across Cycles

S T A R

adaptTo()

Where It Stands

S T A R

PHASE 1 Built, ran once
Generate the PR

PHASE 2 Partly built
Review + Live A/B

PHASE 3 Designed
Promote the Winner

PHASE 4 Designed
Learn Across Cycles

DONE

- Coordinator + 5 agents on the Claude Agent SDK
- 8 conversion lenses the Analyst scores against
- A/B selector with RUM variant tagging
- One real cycle on a hero block: ~17 min, $2.25

MISSING

- Real RUM data (a seed file today)
- A live experiment and result.md
- Agent-opened PRs (off by default today)
- Phase 3 promotion, Phase 4 retrospective

LESSON FROM RUN 1

The Validator passed a variant that was never wired up. The check now confirms the variant goes through the real selector.

adaptTo()

Same Split, New Job

S T A R

	MIGRATION ROUTE	CONVERSION FACTORY
Human	Picks the sources, judges the pages	**Brings the theory, merges the winner**
Agentic	Writes the pages, scores fidelity	**Builds variants, reads the results**
Deterministic	Routes, fans out, keeps the record	**Runs the A/B, keeps the record in git**

Open question: how do you measure A/B tests on Edge Delivery? RUM, Target, something custom? Come find me.
